Education

Lovely Professional University

2019 – 2023

B.Tech in Computer Science and Engineering (CGPA: 9.04)

Experience

Formulo

Feb 2026 – Present

Senior Full-stack Web Developer

- Led end-to-end full-stack development for core product features using Vue.js, Flask, React, and AWS services
- Designed and integrated Shopify GraphQL APIs with internal backend systems for workflow automation and data synchronization
- Built and optimized scalable backend workflows for doctor-user onboarding and operational automation
- Implemented AWS Lambda functions and CloudWatch-based logging automation to push scheduled application logs to Slack channels
- Developed internal Python packages and wrappers around Gmail API, Slack API, Interakt WhatsApp APIs, and JWT-based authentication workflows
- Collaborated across product, backend, and frontend teams to architect and deliver production-grade features

Formulo

Jan 2024 – Jan 2026

Junior Full-stack Web Developer

- Designed scalable backend APIs and integrated third-party services for business workflows
- Enabled Vite-based SSR in Vue.js, improving SEO and reducing FCP by 40%
- Optimized application performance through bundle reduction, lazy loading, and backend response improvements
- Integrated Zoho CRM, Zoho Inventory, Shopify, Interakt, and Gupshup into operational and customer communication pipelines
- Contributed to feature planning, database-driven workflows, and cross-functional product enhancements

Formulo

Jul 2023 – Jan 2024

Full Stack Web Developer Intern

- Built and maintained internal tools and client-facing features across frontend and backend systems
- Developed REST APIs and backend services for scalable internal workflows and automation systems
- Assisted in debugging, deployment workflows, API integrations, and feature architecture
- Worked with external platforms including Zoho CRM, Interakt, and Gupshup for operational automation

Infineon Technologies

Jul 2022 – May 2023

Software Development Intern

- Developed in-house automation tools and desktop utilities using Python for testing and workflow optimization
- Reduced manual testing effort through automation scripting and process improvements
- Analyzed and benchmarked performance of automotive driver APIs for embedded systems
- Replaced dependency on Rapita tools through internal tooling solutions, reducing licensing costs significantly

Projects

Pocketify | Flutter, Firebase, Dart

Feb 2022 – Jul 2022

- Built a budget management app to track income and expenses with visualization
- Designed intuitive UI using Flutter Material components and integrated Firebase backend

Performance Analyzer | Python

Jul 2022 – May 2023

- Developed a Python-based tool to analyze latency and performance of automotive driver APIs
- Packaged the solution as a reusable Python module for internal usage

Builders On Board | Next.js, Flask, JWT, Deployment

May 2024 – Jun 2024

- Built a service marketplace platform for daily repair and furnishing needs
- Implemented secure authentication using JWT and deployed frontend and backend services

Skills

Languages: Python, C++, JavaScript, TypeScript

Frontend: Vue.js, React, HTML, CSS

Backend: Flask, FastAPI

Tools: Git, Firebase, AWS Lambda, AWS cloudwatch, AWS EventBridge, Jira, Langchain(Basics), Bootstrap5

Concepts: REST APIs, Authentication (JWT), Testing, Automation, ETL

Platforms: Zoho CRM, Zoho Inventory, Shopify, Interakt, Gupshup, Google APIs, reCaptcha
